Fractured slope in hyalite

Date
Wed, 02/07/2024 - 14:20
Activity
Skiing

Skied a northeast face that was around 35-40 degrees at around 9000 ft. Entire slope fractured on second ski cut but did not slide. A dusting of new snow, with a good bit of powder on the ground.

Region
Northern Gallatin
Location (from list)
Hyalite - main fork
Observer Name
Jay Alford
