Beehive Basin Persistent Layer Observed in CT

Date
Thu, 02/08/2024 - 05:05
Activity
Skiing

Cracking about 20ft long observed during our tour when crossing over a gully/stream at 35 degree slope angle. Crust about 25-30 centimeters below soft snow showed instability along with the faceted base toward the bottom of the snowpack.

Region
Northern Madison
Location (from list)
Beehive Basin
Observer Name
John Emmett; Jamie McCready
