# Avalanches in Beehive Basin

Date
Sun, 02/04/2024 - 13:50
Activity
Skiing

Multiple natural avalanches and at least one suspected human triggered dry loose in Beehive Basin. Most naturals appeared to have run either last night or yesterday (2/3/24), with a couple potentially older slides. New snow and rapidly changing cloud cover/depth perception made it a bit hard to be sure. Suspect one skier trigged dry loose in W facing trees. One of the W-facing chutes further up valley was also observed to have a crown line at approximately 9000' (no photo)

Region
Northern Madison
Location (from list)
Beehive Basin
Observer Name
Matt Zia
