## Ice climber triggered small slab in Hyalite

Hyalite - main fork Northern Gallatin 11/9/2018 Code SS-AFu-R1-D1-S Aspect W Latitude 45.43980 Longitude -110.95400

Ice climber triggered. From e-mail: "Was descending off of Zach Attack tonight and set off a small <u>slab</u> in the gully on the decent. This was about 100 meters below the start of pitch 1. Constant whipping winds and lots of new deposited snow likely caused the <u>slab</u> to form. Climber caused. Didn't carry me as it was small. Would be wary of the mummy cooler gullies abover scepter as well."
