

A skier in Hyalite wrote, "Natural activity that I observed was failing at new/old interface and (generally) occurred in predictable, wind loaded locations near ridge lines. The one exception is the avalanche with the freshest debris; looks like it failed right at the end of the storm in a somewhat sheltered, mid-slope location." Photo: B. VandenBos Advisory Region Northern Gallatin Longitude -110.96W Latitude 45.45N **Avalanche Details:** <u>Natural avalanches in Hyalite</u> Northern Gallatin, 2019-10-30
