Specimen Creek Natural Avalanche

Specimen Creek Southern Gallatin 12/26/2020 Code SS-N-R1 Latitude 45.02650 Longitude -111.04800 Notes

From email: "Went for a tour today on specimen ridge in yellowstone park. Stuck to terrain well below 30 degrees. Widespread whumphs throughout tour. Cracking and collapsing snowpack on small convexities. Observed multiple small avalanches on windloaded slopes. I believe they were triggered remotely by game."
