

Skier Triggered Avalanche Mount Blackmore - East Face

Mt Blackmore

Northern Gallatin

12/28/2020

Code

SS-ASu-R1-D1-O

Elevation

9500

Aspect

E

Latitude

45.44460

Longitude

-111.00000

Notes

From obs: "Skier Triggered a 1.5' [slide](#) to his right while making a turn near a cliff band. The [slide](#) did not intersect with the skier's path. We did a ECT before choosing our line and were not able to get the soft [slab](#), or anything else to propagate, but clearly, the [slab](#) is ready to go as it slid on rocks. We both skied out without incident."

Number of slides

1

Number caught

0

Number buried

0

Avalanche Type

Soft slab avalanche

Trigger

Skier

Trigger Modifier

u-An unintentional release

R size

1

D size

1

Bed Surface

O - Old snow

Problem Type

Persistent Weak Layer
