

Bald Mountain, Jardine, MT

Date

Wed, 01/06/2021 - 15:50

Activity

Skiing

On a wind loaded, rocky slope off the summit of Bald Mountain we triggered a remote slide about a 100 across from us while skiing. Conditions elsewhere in the area were decent, but the exposed, wind loaded slopes showed activity with whoomping and cracks, and the one avalanche. None where hurt or caught. Conditions were as advised in the avalanche report.

Region

Out of Advisory Area

Location (from list)

Jardine
