

Mt Blackmore

Date

Thu, 01/07/2021 - 20:36

Activity

Skiing

GNFAC,

Toured up Mt Blackmore today, good skiing up there! It was snowing throughout the day and probably accumulated an inch or two while we were out. Winds were calm on the ridge. We dug a pit off the skin track near the ridge on a SE face around 9600'. HS was 120cm, we got an ECTP30 down 90cm on a 10cm layer of small 4f facets.

Psyched it's snowing!
