

Cooke City, Republic Creek

Date

Mon, 01/18/2021 - 14:07

Activity

Skiing

On a W facing slope in dense to gladed trees just east of the Republic Creek skin track, 8200" - 9200". Snow was not wind loaded at all. There was a buried weak layer about a foot below the new snow, but the new snow had not formed a slab so stability seemed good. There was one incident of a collapse crossing a small gully at about 40deg, a crack formed but did not slide probably due to no wind loading.

Region

Cooke City

Location (from list)

COOKE CITY
