

Natural wet slides in Bridger Range, 4/26-4/28

BRIDGER RANGE

Bridger Range

4/28/2021

Code

WL-N

Latitude

45.85120

Longitude

-110.94800

Notes

From obs: "I traversed the Bridger range yesterday (4/28/21). The alpine start was good and solid but I saw lots of recent avalanches that looked super wet, some that had broken a couple feet deep. Conditions were pretty stable until about 1300 when that most recent snow layer started to really want to [slide](#) on the crust. Once I was in the meadows between Baldy and the M, at about 1400, I started hearing/feeling really wet "whumps".
