Natural new snow avalanche on Emigrant Peak

Emigrant Peak Out of Advisory Area 1/8/2022 Code SS-N-R2-D2-I Elevation 10400 Aspect E Latitude 45.26640 Longitude -110.70400 Notes

From obs 1/10/21: "Saw this recent natural <u>slide</u>, probably a day or two old, while skiing on Emigrant. Start zone approx 10,400ft, E facing. We guessed the crown was 3-5ft deep. Evidence of <u>wind loading</u> on similar surrounding slopes, suggesting <u>wind slab</u> as culprit." Photo: T. Benson
