

Wet Loose on Silken Falls

Date

Thu, 03/03/2022 - 13:15

Activity

Ice Climbing

Witnessed a small (R1-D2) naturally released wet loose slide above Silken Falls (8000', W) at approximately 1:15pm on 3/3/21. Video below.

Upon returning to the Grotto Falls Lot (6900') at ~3pm we witnessed two more small but powerful naturally triggered wet loose slides near Black Magic (E aspect) and to looker's right.

Region

Northern Gallatin

Location (from list)

Hyalite - main fork

Observer Name

Sharon Birchfield
