

Wind slab in Hyalite

Date

Mon, 03/14/2022 - 15:40

Activity

Skiing

Snowboarding

My partner dropped first from the top of Blackmore down the East face and did a ski cut at the top and remotely triggered a wind slab. When he did his ski cut he was about 50 feet above the crown.

Region

Northern Gallatin

Location (from list)

Hyalite - main fork

Observer Name

Taylor Rider
