

# Lick Creek Snowpack

Date

Tue, 11/15/2022 - 11:30

Activity

Skiing

First tour out in Hyalite today and thought I'd share some quick data I gathered from the Lick Creek saddle.

50-60cm of snow out there with hardly any wind effect on it.

The quick pit I dug was:

0-25cm F 1-1.5mm faceting rounds

25-27 1F solar crust (easily broken)

27-43 4F 1mm rounds

43-55 F new snow

Cheers!

Region

Northern Gallatin

Location (from list)

Lick Creek

Observer Name

Nick Roe
