

Sluffing and wet slides on blackmore

Date

Wed, 03/22/2023 - 12:25

Activity

Skiing

Sorry no photos, but I toured up blackmore today and saw alot of sluffing on steep terrain and very wet snow on s terrain. I pushed off a small wet slide that built a good amount of momentum and could've ran far if the terrain allowed. I did dig a pit down to the new old snow interface and had no results in an ect.

Region

Northern Gallatin

Location (from list)

Mt Blackmore

Observer Name

Todd Schlotfeldt
