

Pit to ground in Beehive Basin

Date

Sun, 04/02/2023 - 13:00

Activity

Skiing

We dug a pit to the ground (260cm) on the west wall in Beehive Basin to target observations for the Deep Slab problem. Attached is a SnowPilot graph of the layers, hardness, and grain identification. We performed a PST but did not get any results on the deeper facet layer, possibly due to the column not being fully isolated in the 260cm pit.

Region

Northern Madison

Location (from list)

Beehive Basin

Observer Name

Jackson Krause
