

Large natural on Sheep Mtn

Sheep Mountain

Cooke City

1/24/2024

Code

N

Aspect

NE

Latitude

45.07220

Longitude

-109.92800

Notes

From email: "

I did not get a good photo but yesterday (01/24) skiing out of the yurt with friends noticed a large natural on the NorthEast facing bowl on Sheep Mountain. Similar size to the Henderson [slide](#) if not a little larger.

~300 ft. crown and ran a similar distance (300-400ft?)"

Number of slides

1
