

Storm slab avalanches at Bridger Bowl

Date

Thu, 05/23/2024 - 11:00

Activity

Skiing

Toured to the top of PK during today's storm. Snow was very wet and heavy. We saw no other slides or signs of instability on the way up. Coming down skiers right of flippers, all 3 of us caused small slides and cracking within the new snow. I triggered the largest slide, which was 6-8" deep and 12' wide.

Region

Bridger Range

Location (from list)

Bridger Bowl

Observer Name

Taylor Jordan
