

BSSP triggered avalanches on facets and wind slabs

Date

Tue, 11/26/2024 - 01:05

Big Sky Ski Patrol triggered this avalanche during mitigation work in The Wave on 11/26/24... "2-3' deep on an ice crust just above the ground with a 2# shot in the Upper rodeo. Volume was limited as most of the snow was loaded just underneath the [cornice](#), but still produced a sizeable size 2... Other paths in the Lenin region ran meaty wind slabs, full [track](#) with no significant step downs." Photo: BSSP

Region

Northern Madison

Location (from list)

Big Sky Resort

Observer Name

Big Sky Ski Patrol
