

Natural Avalanche on Arden Pk.

Date

Thu, 12/19/2024 - 10:40

Activity

Skiing

Observed from Flanders this morning. Presumed recent natural slide around ~9950 ft. on a E/NE aspect. Hard to tell from a distance, but cornice interference and/or wind loading are possible culprits. Poor image quality, but there may be more debris piles along the ridgeline to the south.

Region

Northern Gallatin

Location (from list)

Maid of the Mist

Observer Name

E. Webb
