

Poor Profile and Test Score at Fairy Lake

Date

Sun, 01/19/2025 - 12:30

Activity

Skiing

ECTP22 at 20CM. Bottom layer is a high concern to me. We experienced whumphs the entire walk in from the parking lot and had a pretty sketchy time attempting to ski a glade directly above fairy lake. The refrozen snow above the weak layer also adds some false security at a glance.

Region

Bridger Range

Location (from list)

Fairy Lake
